## *What is a Diner?*

A diner is insouciance, happiness and joy of being together eating a hamburger or a chocolate milkshake to the rhythm of Rock'n'Roll.

It's born in the States in the beginning of the '50s all along the American highways in response to the sadness of the World War II. The diners are characterized by typical and original furniture: square footage, curved lines, neon lights and special tables where you can eat lots of delicious things made in USA.
